

 2011 rev-elation

ELECTRONIC MATTER FILE

Stuart Kay
Joshua Fireman

 2011 rev-elation

- If I could easily see my documents and email in a way that makes sense...
- If I could work more effectively with my matter team...
- If only I knew who could help me...
- If knowledge came to me...
- If my clients could get a status update without more work...
- If I could see how many of my hours were collected...
- If I could have a weekend...

 2011 rev-elation

- If I could see how the matter is progressing...
- If I could see how the attorneys are doing...
- If I could see how WIP, bills and collections are tracking...
- If I could see a roll-up of what we're doing for the client...
- If new business opportunities for the client appeared...
- If I could spend more time on my yacht...

i/m 2011 rev-elation

- If only I could fix the DMS without changing my DMS...
- If I could integrate content without a data warehouse project...
- If I had the luxury of introducing change that wasn't "Big Bang"...
- If I could evolve a system without changing client-side software...
- If I could give my lawyers apps, not applications...

BARBER & MCKENZIE

i/m 2011 rev-elation

This is **not** what we are trying to replicate:

BARBER & MCKENZIE

i/m 2011 rev-elation

How do we build it?

BARBER & MCKENZIE

What is the first step?

2011
i/m rev-elation

Baker & McKenzie
